THIS IS UNEVALUATED INFORMATION

Between early January and late March 1951, all Russian naval vessels in Swinoujscie underwent degaussing. The degaussing equipment is situated in the coal harbor. Vessels being demagnetized are anchored between two buoys, and the process takes about 24 hours. The equipment is used almost exclusively by the Soviet Navy.

During the period of observation only one non-Soviet ship, a Polish survey vessel, was noted undergoing degaussing.
